

# IS YOUR HAIR-REMOVAL PROCESS SAFE?

Perfect Brow

Beautiful Lip

Smooth Chin

## Think Twice. Decide Once.

There has been a lot of talk recently about the safeness of hair-removal products. Is your salon safe? Think twice before you decide... unless you're already going to a registered Nufree salon. Extensive scientific testing proves Nufree® to be a self-preserving antibacterial, antimicrobial hair-removal system, ensuring that Nufree is safe and effective. Nufree treatments are only available in registered salons with licensed beauty professionals.

*But safety is just the start. No other hair-removal system performs like Nufree:*

- Nufree is not a wax, so you won't experience the pain of a typical wax service.
- finipil® - our patented lotion cools and protects the empty hair follicle.
- You can swim, tan or apply makeup immediately after a Nufree treatment.
- Nufree finipil is safe for face and body hair removal.
- After one Nufree finipil treatment, you will stay hair-free for weeks.

Nufree® finipil®
